

## Memory of the star

Outline 1 Can't we communicate beyond the time?

IPv4 enabled communication beyond one place.  
Can't we talk or relate to people in the past?

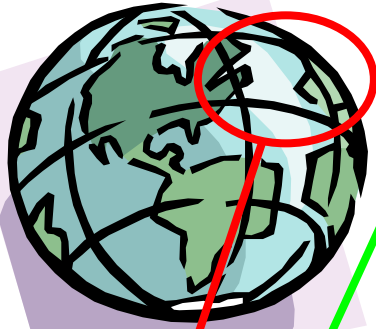

Outline 2 So?

By attaching thoughts to a place, person, or object,  
you can travel time.

Outline 3 Example

In case of a place, connect the IPv6 address with  
coordinates  
→ By accessing to the IPv6 address, it will take you to  
the “Private message board” of a certain place .

Mr. A

Mr. A(2000,January)  
 Reached the top of the mountain at last.  
 The weather hasn't become bad yet. Fine weather.

Mr. B(2003,January)  
 The same condition as 2 years ago. Fine weather.

Mr. A(2010,July)  
 Top of the mountain in July is like a flower garden.  
 By the way when I came here in 2000...

Mr. A's address

fe80::290:ccff:fe0f:b100

Mr. A (2000, January)  
 I'm going to climb.  
 Worrying if weather will become bad.

Mr. B (2003,January)  
 When the weather was like that before,  
 it became sunny.

Mr. B
